

1GB - OS

1GB for each 4GB from 4-16GB

1GB for each 8GB above 16GB

Ex: 64GB = max memory of 54GB

1GB	OS
3GB	4-16
6GB	16-64
10GB	

MaxServerMemory calculation:

Reserve 1GB for the OS initially, then add 1GB for each 4GB from 4-16GB, and 1GB for each 8GB above 16GB.
